REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach: Regarding Claim(s) 1, safety barrier for a work station having a support surface, a work piece holder on the support surface and having a front end and a rear end, a work piece being held by the work piece holder, and a tool adapted to engage and perform tasks on the work piece, the barrier comprising: an elongated roller extending between the first and second frames and being mounted for rotation about a longitudinal roller axis located in spaced relation above the supporting surface; a flexible safety barrier rolled up on the roller and having an upper barrier end attached to the roller and a free barrier end adapted to move from a rolled up position adjacent the roller to a rolled down position adjacent the supporting surface in response to rotation of the roller about the roller axis; each of the first and second frame members having a guide for guiding the flexible barrier as the free end of the barrier moves from the rolled up position to the rolled down position; the guides of the first and second frame members guiding the lower barrier end sufficiently close to the work piece holder to eliminate sufficient space there between for a human being standing on the support surface; and Regarding Claim(s) 9, an elongated roller extending between the first and second frames and being mounted for rotation about a longitudinal roller axis located in spaced relation above the supporting surface; a flexible safety barrier rolled up on the roller and having an upper barrier end attached to the roller and a free barrier end adapted to move from a rolled up position adjacent the roller to a rolled down position adjacent the supporting surface in response to rotation of the roller about the roller axis; each of the first and second frame members having a guide for guiding the flexible barrier as the free end of the barrier moves from the rolled up position to the rolled down
